1969-

73

PREFACE

The index to volumes VI-X of "Bibliographia Anastatica", herewith published, concludes the second part of our international bibliography of photomechanical reprints in book form, covering the years 1969–1973. Together with the first part, volumes I-V, about 50 000 titles have been registered now.

Instructions for the use of this index are the same as given in the preface of the index to volumes I-V:

After each short title reference is made to locate the listing in one of the volumes by Roman numerals followed by the entry number under which the title has been listed in that volume.

Author's names have been printed in bold type; in case works have been written by more than one author, the entry has been made under the first author's name. Periodicals, serials and anonymous works have been reproduced in smaller type. Entries, starting with the same word or name have been replaced by a dash (—).

Publishers, not yet mentioned in the index to vols. I–V, or whose addresses have been changed are noted on the following pages in alphabetical order.
